

DAL SEME AL PIATTO 2

Sandra Spagnolo (s.spagnolo@unisg.it), Alieksei Taran (a.taran@unisg.it), Paola Migliorini (p.migliorini@unisg.it)

Collaboration between research and the agricultural world is necessary to implement knowledge and to bring the experience necessary to reproduce the seed of local varieties that are disappearing into the hands of farmers.

Goals

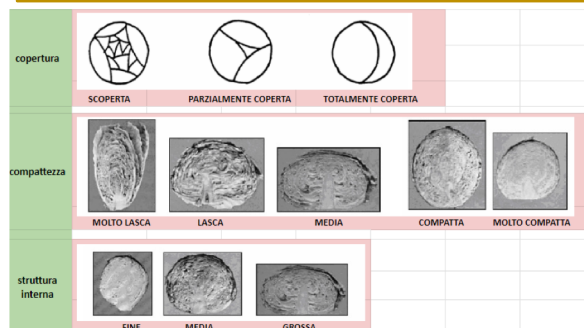

- Creation of descriptive cards of local vegetable varieties of the Ligurian territory:

1. Pisello di Lavagna
2. Cavolo nero genovese
3. Radice genovese (simile alla Radice di Chiavari) Cavolo Garbuxo
4. Cavolo riccio genovese
5. Ravacou - Cavolo navone genovese
6. Melanzana tonda piccola genovese
7. Broccolo lavagnino
8. Bietola da taglio - GIÆA PICCINN-A
9. Cou "da vacche" - cavolo delle vacche
10. Broccolata genovese precoce
11. Broccolata genovese tardiva

- conservation improvement of varieties;
- historical research.

Activity

- Agronomic and phenotypic observations for the characterization of varieties;
- conservative improvement of 8 varieties;
- compilation of the descriptive sheets for each variety;
- realization of moments of participatory selection.

Phenotypic characters for the description of Brassica oleracea varieties

DURATION OF THE PROJECT: 24 months
(from February 2023 to February 2025)

Partner

Az. Agricola Verdure naturali (GE), capofila UNISG, (CN)
Coldiretti - (GE)
Ist. Istruzione Superiore Marsano (GE)
Az. Agricola Michele Ravera, Rovegno (GE)
Az. Agricola La Tabacca, (GE)
Az. Agricola Saxu, (GE)
Az. Agricola Costantini Fabio, Rapallo (GE)
Az. Agricola Tutti giù per terra, (GE)

Expected results

Recovery, conservation improvement and reproduction of varieties;
Morphological and agronomic characterization;
Creation of a descriptive card of the varieties.
